

Bartholomew County Courthouse

Completed 1874

- The courthouse is a 3 story red-brick building trimmed in limestone and features a clock tower that makes the entire building 154 feet tall.
- **Goal:** Your task is to create a clock.
- **Think About Your Structure:** Will your clock look like a typical clock with a round shape? Or will you create a 3D clock or even a rectangular clock?
- **Hint:** How creative are you going to get? Just make sure you have the numbers 1-12 and an hour and minute hand. Then, make your clock as unique as you want!
- **Now What?** Where would this clock be located? Is this clock for a gathering space, a house or a classroom?
