Bartholomew County Public Library

Completed 1969 - Addition 1987

- The Bartholomew Public Library features a ceiling that appears to be “waffled” and is called a coffered ceiling.
- **Goal:** Your task is to create a coffered ceiling.
- **Think About Your Structure:** The coffered ceiling means that the ceiling is “waffled” with deep inset squares that contain the mechanical, electrical and plumbing so there needs to be space too!
- **Hint:** Creating a coffered ceiling doesn’t mean that it has to be on the top of a structure. Just try to focus on creating the “waffled” element. Could you use an egg carton or actual waffle to get started?
- **Now What?** What was the easiest part of creating a coffered ceiling? Was it harder than you thought?

- Paper Towel Rolls
- Toilet Paper Rolls
- Construction Paper
