

Columbus Regional Hospital Campus

Completed 1992 - Addition 2015

- Columbus Regional Health Campus references the influence of Frank Lloyd Wright on the exterior of the hospital with elements of low-pitched roof, columns, and paned windows.
- **Goal:** Your task is to create a structure with columns.
- **Think About Your Structure:** Columns support the structure and are typically round in shape. What materials would you use to help create the stability of the columns?
- **Hint:** Start by building your columns first so you know it will support the structure you are building. If it doesn't work the first time, think about what you can change and try again!
- **Now What?** Where have you seen columns around your town? Do they appear to be just decorative columns or do they support the building? How do you know?

- Paper Towel Rolls
- Blocks
- Construction Paper
