

Mill Race Center

Completed 2011

- The curving brick exterior of this building creates views of the natural surroundings of the park and increases the sunshine in the building.
- **Goal:** Your task is to create a structure with a curved exterior wall.
- **Think About Your Structure:** How will you create a curve? Will it be a large and drastic curve or a small subtle curve?
- **Hint:** Start with a gentle curve for your building. If you find it easy to create the curve, start experimenting with the degree of the curve and make it more drastic.
- **Now What?** How does your structure look from different views with the curved wall?

• Blocks
 • Construction Paper
 • Painters Tape
